Web service description
The NSW Topographic Map Cache Web Service provides rasterised topographic maps in a seamless mosaic view covering NSW. This service generally contains the current standard Topographic maps from the 1:100,000; 1:50,000 and 1:25,000 series. Where coverage exists at multiple scales, the largest scale map is displayed.

The sourced Geotiff file is cropped to the map window only, with no legend, disclaimers, map grid, scale bar or north arrow displayed. The NSW Topographic Map series is derived from Spatial Services’ Digital Topographic Database (DTDB).

Information viewed in this web service includes:
- roads
- points of interest
- localities
- contours
- drainage
- cultural data
- parks and forests
- property boundaries.

Web service uses/fitness for purpose
This web service allows users to easily integrate the topographic map cache coverage for NSW into Open Geospatial Consortium (OGC) compliant spatial platforms and applications.

The NSW Topographic Map Cache web service can be used for mapping, emergency services, natural resource management, geosciences and sustainable development.

This service ensures users are able to consume topographic map data without the requirement of hosting the map files on their own servers.

It is important to note that depictions of roads and tracks do not necessarily indicate a public right of way. Unlawful entry upon private land or a restricted area and/or wilful damage of property such as gates and fences exposes offenders to legal prosecution.

For detailed information on the DTDB, its feature classes and delivery model, please refer to the DTDB metadata records and the data delivery model available at http://spatialservices.finance.nsw.gov.au/mapping_and_imagery/spatial_data.
Current state
This web service is complete and current.

Update frequency
As required.

Future development
This web service is updated when new information is captured or sourced by Spatial Services.

Standards and specifications
Open Geospatial Consortium (OGC) compliant and suitable for consumption by common GIS platforms.

This dataset is compliant with the NSW Foundation Spatial Data Framework and its specifications.

Access and licensing
Accessible through Spatial Services Spatial Data Services.

To the extent that Creative Commons licensing applies, all data and other material produced by Spatial Services constitutes Crown copyright.

Save for the content in this web service supplied by third parties, the Spatial Services logo, NSW Government logo, the Commonwealth Coat of Arms, and any material protected by a trade mark. Spatial Services has applied the Creative Commons Attribution 3.0 Australia Licence.

Spatial Services asserts the right to be attributed as author of the original material in the following manner:
