**Date: 6 October 2017**

## **Survey Control Information Management System (SCIMS), Survey Marks and Board of Surveying and Spatial Information (BOSSI) fee changes from 1 July 2017**

From 1 July 2017 Spatial Services, a unit of the Department of Finance, Services & Innovation, has increased fees for some SCIMS products and services and for services provided by BOSSI. These increases were in line with New South Wales Treasury's forecast for inflation. Details are set out in the attached table.

### **SCIMS**

SCIMS contains coordinates and related information for survey marks established under the direction of the Surveyor General and is maintained for the purposes of cadastral boundary definition, engineering surveys, mapping and other spatial applications. Customers are encouraged to access SCIMS products online where they are available at lower rates.

### **Control Survey Mark Fittings**

Control Survey Marks are prescribed by Clause 27 and Schedule 4 of the *Surveying and Spatial Information Regulation 2017* and provide the basic framework for all types of surveys to be brought onto a common network, the State Control Survey. A control mark is a stable and durable mark of a permanent nature that is uniquely identified by a combination of letters and numbers. Control survey mark fittings are available through a statewide network of organisations.

### **Board of Surveying and Spatial Information (BOSSI)**

The Board of Surveying and Spatial Information is constituted under the *Surveying and Spatial Information Act 2002* to provide for the registration of land and mining surveyors, to regulate the making of surveys and to advise the Minister on spatial information. Related fees are set out in Schedule 7 of the *Surveying and Spatial Information Regulation 2017*.

### **Where can I get more information?**
